ASSEMBLY FOR TREATMENT OF THE DEGENERATION OF AN
INTERVERTEBRAL DISK

5

The invention relates to an assembly for treating degeneration of a damaged intervertebral disk disposed between two vertebrae. The treatment assembly comprises:

10 - cells (16) optionally analogous to those of the intervertebral disk, and suitable for implanting in said disk; and

- an intervertebral implant (10) comprising:

- an intervertebral spacer (12) for placing between said vertebrae; and

15 - fastener means (14) for fastening said spacer on said vertebrae.
